PROJECTS

Food Ordering App (Hungry-Hippo)

Developed a food ordering app using Swiggy's API, React, Redux Toolkit, and modern web technologies to provide a seamless browsing and ordering experience.

YouTube Clone

Built a YouTube clone with the MERN stack, featuring video uploads, playback, and user authentication, ensuring a smooth and interactive user interface.

Chat Application

Created a real-time chat application with Node.js, Express, MongoDB, and React, implementing WebSocket for real-time communication and robust user authentication.

Summary

In summary, my technical skills, problem-solving abilities, and strong communication, paired with my core values of collaboration, innovation, and delivering quality solutions, position me as a dedicated and effective MERN developer. I am enthusiastic about the opportunity to contribute to the organization's development efforts and would welcome the chance to discuss how my background, skills, and values align with the organization's needs. Please feel free to contact me to schedule a conversation or interview.
